BOX CULVERT REPLACEMENT ON NH ROUTE 3A IN PLYMOUTH
LANE CLOSURE NECESSARY FOR FOUR MONTHS

The New Hampshire Department of Transportation announces work is scheduled to get underway on Monday, December 16 on the planned replacement of a box culvert over an unnamed brook on NH Route 3A in Plymouth.

This work was originally scheduled to begin on November 12, but was delayed.

The box culvert is located approximately one-half mile south of the Route 3A intersection with NH Route 25.

In order to complete this culvert replacement project, traffic will be reduced to a single lane at this location on Route 3A for approximately 16 weeks. Warning signs, barrels, temporary signals and concrete barriers will be used to guide motorists through the work zone.
